Date Adopted: [INSERT]
Draft: v3 – November 4, 2025
Policy Name: New Customer Refresh Noticing & Enrollment Policy

See [New Customer Refresh Info Sheet](#) for background information.

Summary

The CEO or their designee, in consultation with the Portfolio Manager, is responsible for determining the timing and cadence of new customer refresh noticing and enrollment towards achieving the objectives of this policy.

Members may provide criteria to guide periodic refreshes for their aggregation program by governing body vote to amend their Electric Aggregation Plan. Such guidance should be developed in coordination with CPCNH staff to ensure operational feasibility.

New Customer Refresh Practice

In accordance with the legal, regulatory, and policy frameworks and requirements, CPCNH shall periodically conduct refresh noticing and enrollment of new customers.

The CEO or their designee is responsible for determining the timing and cadence of new customer refresh noticing and enrollment towards achieving the objectives of this policy.

Upon adoption of this policy the CEO shall cause the Member Representatives and Principal Executive Officers of each Operating CPA to be notified of the policy adoption and provided access to review the policy.

Prior to CPCNH committing to the first refresh after initial adoption of this policy each Member, through their Representative or Principal Executive Officer, may notify the CEO by December 31, 2025 that they are considering amending their EAP to provide criteria to guide the frequency of periodic refreshes for their aggregation program. After providing such notice, each such Member shall have until January 31, 2026 to act on and notify the CPCNH CEO of any such EAP amendment prior to CPCNH committing to refreshing their CPA.

Following the first refresh after initial adoption of this policy, any EAP amendment adopted by a Member's governing body to provide criteria to guide the frequency of periodic refreshes shall be provided to the CEO with documentation of the governing body action. CPCNH will implement guidance provided by any duly received EAP amendments for refresh enrollments occurring in the month that occurs four months after receipt of the guidance (e.g., guidance received in February will be effectuated for refresh enrollments occurring in June and beyond, but not necessarily sooner).

Portfolio and Financial Analysis

The Portfolio Manager is responsible for conducting an analysis of the portfolio and financial impacts of new customer refresh enrollments. The CEO will direct the Portfolio Manager to conduct such analyses to inform refresh practices, cadence, and timing.

The Portfolio Manager will advise the Risk Management Committee on the portfolio and financial impacts associated with new customer refreshes and may recommend adjustments to hedge levels accordingly.

Noticing and Enrollment

The Member Services Department is responsible for managing workflows and protocols for customer noticing and enrollment including but not limited to:

- Coordinating with CPCNH's Data Manager to prepare for and execute enrollments via Electronic Data Interchange (EDI).
- Requesting from utilities customer lists for noticing and relaying to the Data Manager.
- Managing print/mail vendors, workflow timelines, and digital/print copy and design.
- Requesting from utilities customer lists for enrollment and relaying to the Data Manager.
- Fielding customer escalations from the Contact Center.

Authority to Amend

This policy may be amended by majority vote of either the Board of Directors or the Membership at regular or special meetings of either body at which action to amend is properly noticed in accordance with CPCNH's Joint Powers Agreement and By-Laws.

Purpose & Objectives

The purpose of this policy is to detail CPCNH's approach to new customer refresh noticing and enrollment towards achieving the following objectives:

- **Compliance.** Comply with law, administrative rules, local policy, and CPCNH policy.
- **Clarity.** Clarify and create shared understanding among CPCNH's Members, Board, personnel, and customers and the choices available to them.
- **Financial Responsibility.** Ensure customer refresh enrollments ultimately produce beneficial financial impacts to CPCNH's Member Community Power Aggregations (CPAs) and their joint reserve funds.
 - Addition of new loads can be strategically timed and managed in coordination with portfolio management activities and market opportunities. Customer refreshes should have positive impact to Members' joint reserve accruals while spreading fixed costs over a larger customer base to benefit customers.

Context & Legal Framework

State Law: RSA 53-E

"New customer refreshes" are provided for under New Hampshire [RSA 53-E:7 – VI](#).¹

Administrative Rules: Puc 2205.05

Notification and enrollment of customers who apply for new electric service from their utility is further provided for under Administrative Rule [Puc 2205.05 New Utility Service Customers](#).²

Regulatory Compromise Results in Transaction Costs & Inefficiencies

Throughout 2021 and 2022, CPCNH played a leading role in drafting statutory and regulatory language governing CPAs. During the negotiations, multiple approaches to handling enrollments of new customers were considered including:

- 1) Directly enroll customers who apply for electric service into their default CPA program (as is done in certain other CPA markets); or
- 2) First, enroll customers who apply for electric service into utility default service to then be subsequently and periodically noticed and enrolled into their default CPA program.

¹ "New customers to the electric distribution utility after the notification mailing required by paragraph III shall initially be enrolled in utility provided default service unless the customer has relocated within a single utility's service area and is continuing service with a competitive supplier or a municipal or county aggregation program. Upon request of an aggregator, but not more frequently than monthly and notwithstanding RSA 363:38 [Privacy Policies for Individual Customer Data], the utility shall make available to each operating municipal aggregation, or county aggregation where there is no municipal aggregation, the names, account numbers, mailing addresses, and any other information necessary for successful enrollment in the aggregation of customers that are new to or then currently on electric distribution utility provided default service after they have provided the customer list for the initial customer mailing required by paragraph III and that are located within the aggregation service area. The aggregation shall periodically mail a written notification to such new customers that have not previously opted out of the aggregator's service and shall enroll them in the aggregation consistent with the opt-in or opt-out requirements of this paragraph and paragraph III."

² [Puc 2205.05 New Utility Service Customers](#). (a) Electric customers who apply for new service provided by a utility within the CPA service area of a CPA providing opt-out alternative default service pursuant to RSA 53-E:7, III, after the supply of customer names and addresses by the utility for the customer notification mailing required under RSA 53-E:7, III, shall initially be enrolled in default service provided by the utility unless the customer has relocated within a single utility's service area and is continuing with service provided by a CEPS, or has relocated within a CPA service area and is continuing with service provided by or through the CPA.

(b) Upon request of a CPA, but not more frequently than monthly following provision of the customer list for the initial mailing pursuant to Puc 2204.05, the utility shall make available to each operating municipal CPA, or county CPA where there is no municipal CPA, the names, account numbers, mailing addresses, and any other information necessary for successful enrollment in the aggregation of customers that are then currently on utility default service and are located within the CPA service area.

(c) The CPA shall periodically mail a written notification to such new customers that have not previously opted out of the CPA's service and shall enroll them in the CPA consistent with the requirements of Puc 2204.05.

While option 1 has clear benefits of efficiency and reduction of costs that are ultimately born by customers, option 2 was enacted into rules to accommodate the insistence by certain utilities that option 1 could not be achieved by their business systems.

2025 Analysis of CPCNH attrition rates (rate of customer departure from CPCNH service) indicate that natural customer turnover (e.g., customers moving in/out of premises), not opt-outs, is the primary driver of attrition. Of the ~2,750/month reduction in customers observed between February and September 2025, less than 10% are due to opt-outs while the strong majority are due to natural customer turnover. Customers in this "natural attrition" category are eligible for refresh noticing and enrollment into CPA service.

Local Policy: Electric Aggregation Plans

Pursuant to RSA 53-E:6, a municipality may implement CPA service after local legislative body adoption of an "Electric Aggregation Plan" (EAP) providing for:

"Universal access, reliability, and equitable treatment of all classes of customers subject to any differences arising from varying opportunities, tariffs, and arrangements between different electric distribution utilities in their respective franchise territories, and shall meet, at a minimum, the basic environmental and service standards established by the commission and other applicable agencies and laws concerning aggregated service."

An EAP providing for opt-out default service must also be submitted to and approved by the Public Utilities Commission to determine it conforms to state law and regulation.

EAPs of CPCNH Members detail whether energy supply services are offered on an opt-in basis or on an opt-out basis as an alternative default service, among other requirements. EAPs adopted by CPCNH Members and approved by the PUC typically include language to the effect of: *"The program will serve as the default electricity supplier for all [Eversource / Unitil / Liberty] customers on a default 'opt-out' basis."*

Once adopted, an aggregation plan and program may be amended and modified from time to time as provided by the governing body of the municipality or county (RSA 53-E:7 – IX).

Most Member EAPs providing for opt-out default service simply state that after initial launch new utility default service customers will be periodically enrolled on an opt-out basis after 30 days' advance mailed notice, without providing any additional criteria to guide the frequency of such periodic refreshes.

Discussion

State law, administrative rules, and local policy under EAPs make clear that opt-out CPAs are the default electricity supplier and shall periodically notify and enroll new utility customers. The provision that the notification and enrollment be done "periodically" provides for flexibility.

Nashua Community Power

Residential Energy Coaching

Empowering home owners to explore energy efficiency

Program Vision

Support Nashua homeowners to make meaningful energy efficiency upgrades that reduce utility costs, improve comfort, and support citywide sustainability goals.

Energy Bill

Billing Information

Service detail

kWh Usage History

Program Overview

- 10-week hybrid program (5 bi-weekly group sessions + 1:1 coaching)
- Step-by-step support: energy audit to solar
- Focused on rebates, incentives, and local contractor access
- Pilot cohort: ~20 homeowners
- Funded by Nashua Community Power (\$200k allocated). * \$2,000 in energy rebates for each household.

Who Are We Targeting?

1

**Nashua homeowners
(single-family, condos,
small multi-family)**

2

**Residents with high
energy burdens or older
homes**

3

**Households motivated
to make upgrades**

4

**Diverse mix of housing
types and income levels**

10 Week Program Components

- Home energy audits/ Program Partner (secured via RFP)
- Five group sessions:
 - Energy audits & planning
 - Insulation & sealing
 - HVAC & water heating
 - Appliances & behavior
 - Solar & renewables
- One-on-one coaching support throughout to help participants prioritize projects.
- Connection to contractors & rebate navigation

Pre Launch Work Needed

**RFP Audit
Provider**

RFP Is Out And
Closes on
November 7th

**RFP Program
Partner**

RFP Is Out
And Closes
on November
7th

**Program Partner
Identifies
Preferred
Contractors**

December

**Build outreach
tools & digital
resource kits**

December

A black and white photograph showing several hands of different skin tones working together to assemble large, interlocking metal gears. The gears have various shapes and sizes, some with circular cutouts. The hands are positioned around the gears, with fingers and thumbs visible as they fit the pieces together. The background is a plain, light-colored surface.

Ideas For CPCNH

- **Community Value Beyond Rates:** Programs like this demonstrate how Community Power can deliver meaningful local benefits — not just lower electric rates.
- **Bridging the Incentive Gap:** As federal tax credits for energy efficiency upgrades phase out in 2026, CCAs can fill the gap by offering their own rebates that complement existing state programs.
- **Collaborative Opportunity:** Smaller communities can pool resources by adding a small adder to their rates, funding shared programs like regional energy coaching and rebate initiatives.
